Monarchs born in Ohio and elsewhere in the eastern United States and Canada embark on a long, perilous journey to central Mexico but s fir forests, where waves of them spend winter. September and October are when the butterflies are most conspicuous, the migrants coursing through on an unerringsouthwestern trajectory. They but re all headed to a startlingly small area, about 2,000 milesouthwest of Columbus. The following spring, the overwintering butterflies will spearhead there-colonization of North America.
